

COMMITMENT TO EXCELLENCE

Certification & Standards

The Flinchbaugh Company not only holds ISO 9001:2015 certification, but also operates in compliance with the U.S. Government's Mil. Spec for CARC painting. Flinchbaugh is also NIST 800-171 compliant and implementing CMMC level III requirements.

Achievements

We've been recognized by customers as an outstanding supplier of machining services and products, and were nominated by a manufacturing association as a Finalist for Small Business of the Year in the State of PA. We have also received medallion level recognition awards for combined quality and delivery performance from this same US Defense company in 2020, 2021 and 2022.

We have even been awarded Quality Supplier of the year by a major U.S. Defense Company. These achievements stem from a company-wide pursuit to exceed every customer requirement and expectation— on every job, every day.

"Our total value approach enables customers to streamline purchasing. As a unified source, rather than focusing on unit price, we save them time and reduce overhead – increasing overall efficiency."

MACHINE PARTS MADE FOR YOU...

QUALITY CUSTOM MACHINING

The Flinchbaugh Company has been providing quality precision machining and related shop services since 1936. Combining a proactive approach with our operating philosophy, we offer customers an attractive product sourcing alternative that we call **Optimum Lifetime Value**.

Flinchbaugh Company customers enjoy overall savings through reductions in:

- inspections
- quality costs
- transportation
- downtime
- administrative functions

They also benefit from a simplified buying process and a flexible scheduling system built to accommodate sudden order peaks and rush jobs.

Why Top Tier OEMs Choose Flinchbaugh

At The Flinchbaugh Company, we ensure that we earn our partners' trust. We are passionate about quality and will make sure that every step of the process for manufacturing your product is rigorously supervised by our Quality Assurance staff. We provide our customers with detailed solutions, and always communicate with respect and transparency.

Optimum Lifetime Value

Strategic Supply Chain Management
The Flinchbaugh Company is a "one stop shop," with extensive expertise in supply chain management. Our emphasis is on efficient, long-term relationships with our customers and suppliers.

In addition, we manage raw material and support service sourcing against stringent ISO 9001:2015 standards to ensure our customers receive only the highest quality products.

On-time Delivery

To help our customers reduce costs and interruptions, we monitor and manage on time delivery. We deliver locally using our company trucks.

Inventory Control

We accommodate customer purchases for specific release quantities and dates, providing services that match their needs and ensuring that the correct materials will be on hand when they're needed.

Our Vision: The Flinchbaugh Company will be the premier machine shop in South Central Pennsylvania. We will be a supplier and employer of choice, growing our business through outstanding customer service and world class on-time-delivery.

OUR CAPABILITIES

We continually update our facilities and equipment, as well as invest in the development and training of our personnel. As a result, our ten CNC machining centers and six CNC turning centers have a range of capabilities, and together maximize productivity and flexibility.

And we don't just machine parts—we complete value-added operations for those parts, such as sub-assembly work and complete specialized testing requirements. Additionally we paint on site and handle all off-site heat treating, plating, and coating needs for our customers.

LEAN Manufacturing

In addition to our certifications, Flinchbaugh implements the principles and practices of LEAN manufacturing. This means we strive to eliminate waste, optimize efficiency, and commit to continuous improvement with every job.
